Аккумуляторные батареи

Для ноутбуков

Литиевые аккумуляторные батареи производятся на основе современных высококачественных ячеек TopON. В процессе длительного тестирования, они зарекомендовали себя как надежные и высокоэффективные для применения в многоразовых источниках питания. Встроенные датчики термоконтроля, предохранители и контроллеры питания гарантируют надежную и безопасную эксплуатацию.

- Все характеристики и размеры полностью соответствуют штатным батареям
- Емкость батареи соответствует заявленной и аналогична емкости штатного аккумулятора, за счет использования ячеек одинаковой емкости
- Надежное соединение между ячейками без разрыва электрической цепи обеспечивается 4-игольной пайкой
- Встроены схемы защиты от перегрева, скачков напряжения и короткого замыкания
- Низкая скорость саморазряда позволяет хранить батарею долгие месяцы
- Корпус из ударопрочного ABS-пластика
- Низкая скорость саморазряда позволяет хранить батарею долгие месяцы
- Более 500 циклов разряда/заряда без потери емкости
- Средний срок службы батареи TopON составляет 3 года, при условии правильной эксплуатации и соблюдения условий хранения

В ассортименте имеются аккумуляторы стандартной емкости и усиленные батареи повышенной емкости, которые пользуются высоким спросом.

Ячейка Li-Ion 18650, без защиты

Для пылесосов

Совместимые аккумуляторы TopON для роботов-пылесосов и беспроводных пылесосов произведены из современных нетоксичных материалов и созданы на основе элементной базы высокого качества, что позволяет существенно увеличить эффективность работы аккумулятора и гарантировать надежность его эксплуатации в течение длительного времени.

- Все характеристики и размеры полностью соответствуют штатным батареям
- Аккумуляторы изготовлены на основе высококачественных Ni-MH и Li-Ion ячеек
- Емкость батареи соответствует заявленной и аналогична емкости штатного аккумулятора, за счет использования ячеек одинаковой емкости
- Надежное соединение между ячейками без разрыва электрической цепи обеспечивается 4-игольной пайкой
- Встроены схемы защиты от перегрева, скачков напряжения и короткого замыкания
- Низкая скорость саморазряда позволяет хранить батарею долгие месяцы
- Корпус из ударопрочного ABS-пластика или из плотной износостойкой термоусадочной пленки
- Более 1500 циклов разряда/заряда без потери емкости
- Средний срок службы батареи TopON составляет 3 года, при условии правильной эксплуатации и соблюдения условий хранения

В ассортименте имеются аккумуляторы стандартной емкости и усиленные батареи повышенной емкости, которые пользуются высоким спросом.

Внешние универсальные

Универсальные внешние портативные аккумуляторные батареи – Power Bank – прекрасно подходят для регулярной и экстренной зарядки мобильной цифровой техники большинства производителей. Имеют высокую емкость, длительный срок службы, стильный дизайн, а также оригинальную систему защиты от перегрева, короткого замыкания и скачков напряжения. Внешние батареи произведены из современных нетоксичных материалов и созданы на основе элементной базы высокого качества, что позволяет существенно увеличить эффективность работы аккумулятора и гарантировать надежность его эксплуатации.

Каждый универсальный внешний аккумулятор TopON проходит двойной контроль качества: на заводе изготовителе и в специализированном региональном сервисном центре, непосредственно перед отгрузкой в торговую сеть. Благодаря регулярным аудитам на производстве, уже несколько лет процент продукции, несоответствующей потребительским стандартам качества, составляет менее 0,5% и этот показатель продолжает неуклонно снижаться.

Ассортимент внешних батарей TopON позволит подобрать оптимальное решение для любых целей, например, увеличение автономной работы, одновременной зарядки нескольких устройств, питание различного оборудования без доступа к электрической сети, а так же экстренный старт автомобиля. В обновлении линеек универсальных источников питания и внешних батарей, компания TopON привлекает к разработке специалистов из компаний Китая и Тайваня, чья продукция не раз отмечалась наградами на различных выставках в ЮВА, таких как CES Asia, China Sourcing Fair — Electronics & Components и Hong Kong Electronics Fair.

Аккумуляторные фонари-прожекторы

TOP-MX5

Световой поток: 5000 Lumens
Светодиод: LED COB 50W
Встроенный аккумулятор: 14.6V 4.0Ah 58.4Wh
Корпус с защитой IPX4
Подставка с поворотным механизмом
USB-порт с функцией PowerBank
Регулировка яркости от 800 до 5000 lm

TOP-MX2BT

Световой поток: 2000 Lumens
Светодиод: LED COB 20W
Встроенный аккумулятор: 7.3V 4.4Ah 29.2Wh
Корпус с защитой IPX4
Bluetooth акустика
Подставка с поворотным механизмом
USB-порт с функцией PowerBank
Регулировка яркости от 400 до 2000 lm.

TOP-MX1

Световой поток: 1100 Lumens
Светодиод: LED COB 10W
Встроенный аккумулятор: 3.7V 6.6Ah 24.4Wh
Корпус с защитой IPX4
Подставка с поворотным механизмом
USB-порт с функцией PowerBank
Регулировка яркости от 220 до 1100 lm

TOP-MX1MG

Световой поток: 1100 Lumens
Светодиод: LED COB 10W
Встроенный аккумулятор: 3.7V 4.4Ah 16.3Wh
Корпус прорезиненный с защитой IPX4
Подставка с поворотным механизмом
USB-порт с функцией PowerBank
Регулировка яркости от 220 до 1100 lm

Блоки питания

Блоки питания TopON производятся с использованием надежных и долговечных элементов электрической цепи. Имеют стабилизированное напряжение и силу тока на выходе, а так же КПД более 85% и низкое потребление без нагрузки – менее 1Вт. Компактные и достаточно мощные блоки питания TopON обеспечат бесперебойным питанием ваше устройство и позволят быстрее заряжать аккумулятор.

- Блоки питания изготовлены на основе новых емких конденсаторов, гарантирующих стабильное напряжение и силу тока
- Технические характеристики соответствуют заявленным и аналогичны штатным блокам питания
- Размер коннектора соответствует всем техническим требованиям
- Надежно припаянные компоненты исключают разрыв электрической цепи и обеспечивают стабильную работу в течение длительного времени
- Эффективная система теплоотвода защищает от перегрева
- Встроены схемы защит от скачков напряжения, короткого замыкания, перегрузки и падения мощности
- Для снижения помех используется ферритовый фильтр, установленный на исходящем кабеле, либо встроенный в систему
- Сечение исходящего кабеля не менее 0,823 мм² (18AWG)
- Корпус из ударопрочного ABS-пластика
- Средний срок службы блоков питания TopON равен сроку службы штатных зарядных устройств – 3-5 лет при условии правильной эксплуатации и соблюдения условий хранения.
